## Letter of Recommendation

On behalf of **Loulis Food Ingredients** it is my pleasure to recommend **Consumer Insight Consulting** (CIC) for Food Sensory related training.

CIC organized and led a one-day food sensory training for our R&D team, quality control team and baker masters in our R&D center in Keratsini, Greece. The food sensory training consisted of both theory and practical sensory testing. The content was presented in a well-organized manner and provided our participants with all the fundamentals for a solid understanding of food sensory science. It was complimented with a detailed, hands-on practical sensory testing and evaluation of food products.

Ms Agata Markiewicz presented deep knowledge on the topic of sensory testing and set the ground for an interactive workshop where participants had the opportunity to ask many technical questions and have them answered.

To conclude, for all the above reasons, I highly recommend **Consumer Insight Consulting** for carrying out Sensory Workshops delivered by Ms Agata Markiewicz to any organization or professionals who want to achieve a solid and thorough understanding of Sensory Science.

Sincerely,

**LOULIS MILLS S.A.**
